

Elabscience® ELISA Kits

Elabscience® provides researchers with thousands of high-quality ELISA kits for a range of species, including humans, mice, rats, rabbits, monkeys, and more. It is suitable for quantitative analysis of intracellular and extracellular cytokines and receptors, hormones, enzymes and SARS-CoV-2 and other popular targets.

► Excellent Product Performance

- High precision: Both inter and intra CV< 10%
- High sensitivity: pg level
- Good specificity: Cross-reactivity< 10%
- Good recovery: 80%~120%
- Flexible choices on size: 24 T/48 T/96 T/96 T*5/96 T*10
- User friendly : Complete ready-to-use kits

► Strict Production Quality Inspection

Reagent
Improved coating system to reduce coated protein damage. Unique HRP enzyme protection solution to avoid data fluctuation.

Quality Inspection
Strict three-step quality inspection to ensure the stability of the system, quality and quantity.

Technology
Professional production equipment, international standard production process. Accurately control the freeze-drying curve to reduce production errors.

Production
The product has a traceable security code, which can be directly traced to each production link.

► Multiple Species

► Wide Research Areas

► Types of ELISA Kits

Elabscience® provides more than 1,800 high-quality ready-to-use ELISA kits and uncoated ELISA kits. Traditional ELISA, QuickKey Pro™ ELISA, MS ELISA, High Sensitivity ELISA, SARS-CoV-2 ELISA are ready to use. Uncoated ELISA contain matched antibody pairs and the basic components to develop your own immunoassay.

Traditional ELISA Kits <ul style="list-style-type: none">Various protein targetsSample Volume: 100/50 µLOperation Steps: 3/2 StepsStorage: -20°C/4°C	QuickKey Pro™ ELISA Kits <ul style="list-style-type: none">Operation Time: 1.5 hSample Volume: 50 µLOperation Steps: 1 StepStorage: 4°C	MS ELISA Kits <ul style="list-style-type: none">Operation Time: 3.5 hSample Volume: 25 µLOperation Steps: 3 StepsStorage: -20°C/4°C
High Sensitivity ELISA Kits <ul style="list-style-type: none">Operation Time: 3.5 hSample Volume: 100 µLSensitivity: fg/mLStorage: -20°C/4°C	SARS-CoV-2 ELISA Kits <ul style="list-style-type: none">Covering Ab, Ag, NAb, TAB kitsOperation Steps: 1~3 StepsStorage: -20°C/4°C	Uncoated ELISA Kits <ul style="list-style-type: none">Cost-effect and flexible to useOperation Steps: Multi-stepStorage: -20°C

Elabscience® HS ELISA Kits

Elabscience® High Sensitivity (HS) ELISA kit have been iteratively upgraded to increase the sensitivity of the traditional ELISA kits by 2~100 times, and can detect the protein concentration of fg level. They focus on the detection of cytokines and can effectively solve the problem of low detection rate when detecting low concentration samples such as serum and plasma.

► Product Features

- Higher Sensitivity**
Sensitivity up to 0.20 pg/mL
- Higher Detection Rate**
The detection rate of normal serum/plasma samples can reach 30%~100%
- Multiple Sample Validation**
Serum/Plasma/Cell culture supernatants/Tissue homogenates

► High Sensitivity ELISA Targets

Human <ul style="list-style-type: none">IL-1β • IL-2 • IL-6IL-8 • IL-10IL-17A • IFN-γ	Mouse <ul style="list-style-type: none">IL-1β • IL-4 • IL-6IL-10 • IL-17AIL-18 • IFN-γTNF-α	Rat <ul style="list-style-type: none">IL-1β • IL-6IL-10 • IL-12TNF-α
--	---	---

Elabscience® MS ELISA Kits

Elabscience® MS ELISA kit is specially designed for mouse item detection, which reduces the sample volume from the traditional 100 µL to 25 µL, effectively meeting the need for small sample sizes in mice.

► Product Features

Less Sample Only needs 25 µL	Upgraded Production Process With higher sensitivity and better performance	Focus on Research Hotspots Continue to develop new products, closely follow the research hotspots

Elabscience® QuickKey Pro™ ELISA Kits

Elabscience® QuickKey Pro™ (One-Step) ELISA kits are an iterative upgraded new process based on the traditional ELISA kits, only requiring one step of washing, and one step of sample addition. The whole experiment takes only 90 minutes, which is of great help to the experiment efficiency.

E-EL-0047	NA/NE(Noradrenaline/Norepinephrine) ELISA Kit	0.31~20 ng/mL	0.19 ng/mL	52
E-EL-0028	8-OHdG(8-Hydroxydeoxyguanosine) ELISA Kit	31.25~2000 pg/mL	18.75 pg/mL	132
E-EL-0034	PGE2(Prostaglandin E2) ELISA Kit	31.25~2000 pg/mL	18.75 pg/mL	159
E-EL-0033	ST/5-HT(Serotonin/5-Hydroxytryptamine) ELISA Kit	15.63~1000 ng/mL	9.38 ng/mL	76
E-EL-0162	TGF-β1(Transforming Growth Factor Beta 1) ELISA Kit	0.16~10 ng/mL	0.10 ng/mL	80

ELISA Kits Cited in Publications

Elabscience® ELISA products have been cited by 10,000+ SCI papers, with a total impact factor of 45,000+. Our ELISA Kits have been published multiple times in top international journals such as *Cell*, *Nature*, *Nature Medicine*, *Immunity*, *Signal Transduction and Targeted Therapy*, etc.

About Elabscience®

Elabscience® specializes in immunodiagnostic technology for life science community. We have complete platform for R&D and manufacture. At the same time, we have in house QC for every product, endeavoring to keep your experiment results more consistent and precise. Through unremitting effort and development, our customers have spread in more than 150 countries all over the world. Elabscience® major products cover a diverse range of Flow Cytometry Antibodies, Cell Function Assays, Cell Metabolism Assays, ELISA Kits, Proteins and Antibodies, all of which have passed ISO9001 international certification and EU CE certification.
