

Labeling Products Launch Elabscience® July, 2023

Elabscience® Labeling Kit Features

Ready-to-Use

Complete set of components, no additional purchase.

Various Labeling Specifications

0.1~1 mg.

Strong Applicability

The kit can be applied to most proteins.

Excellent Labeling Effect

Optimize the labeling ratio, reduce the possibility of inactivation due to under- or over-labeling.

Fluorochrome Labeling Kit

15 kinds of fluorescence to meet your diverse experimental needs.

Cyanine 3	Cyanine 5	Cyanine 5.5	Cyanine 7	Elab Fluor® 430
Elab Fluor® 488	Elab Fluor® 568	Elab Fluor® 594	Elab Fluor® 647	Elab Fluor® 680
Elab Fluor® 700	Elab Fluor® 750	Elab Fluor® Violet 450	Elab Fluor® Red 780	FITC

Biotin Labeling Kit

Various biotin labeling, more options for you.

Chromogenic Biotin

NHS-LC-LC-Biotin

NH₂_Reactive Biotin

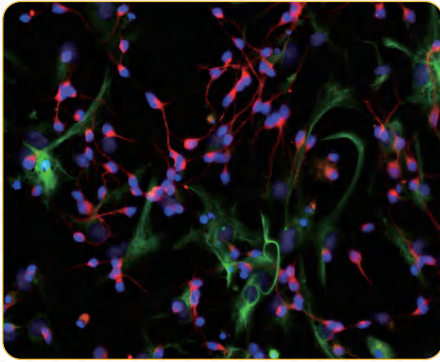

Sulfo-NHS-Biotin

Sulfo-NHS-LC-LC-Biotin

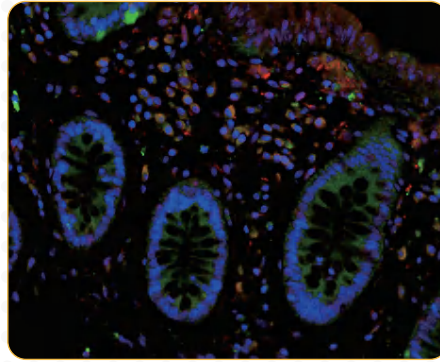

Labeling Related Kit

Product Name	Cat.No.	Application
BSA Removal Kit	E-LK-R002	Remove BSA from protein or antibody solution to facilitate subsequent labeling experiments

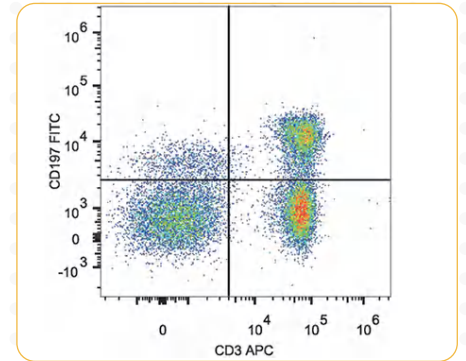

Labeling Experimental Results

• IF Experimental Result

• IF Experimental Result

• FCM Experimental Result

Time limited? High requirements for labeling products?

Don't worry, you have access to Labeling Service from Elabscience!

Elabscience® Labeling Service

Your reliable labeling experiment assistant!

Service Features

Fast service, only 1~2 weeks to complete the whole service process

High labeling success rate $\geq 95\%$

A variety of fluorochrome labels are available

Service can be provided to help you choose the best experimental scheme

For more information, please visit our website www.elabscience.com, you can speak to us on livechat, our Scientific Support team are here to help you with any technical question you may have regarding our products.
