# Biotin Anti-Mouse F4/80 Antibody[CI:A3-1]

Catalog No.E-AB-F0995BReactivityMouseStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

Alternate Names Adhesion G protein-coupled receptor E1, Adgre1, Cell surface glycoprotein F4/80, EGF-like

module receptor 1,Adgre1,Emr1, Gpf480

Uniprot ID Q61549

**Background** F4/80 is a 160 kD glycoprotein. It is characterized as a member of the epidermal growth factor

(EGF)-transmembrane 7 (TM7) family. F4/80, also known as EMR1 or Ly71, has been widely used as a murine macrophage marker, which is expressed on the majority of tissue macrophages including peritoneal macrophages, macrophages in lung, gut, thymus and red pulp of spleen (but not on the macrophages located in T cell areas of the spleen, lymph node and Peyer's patch), Kuffer cells, Langerhans cells, and bone marrow stromal cells. F4/80 has also been shown on a subset of dendritic cells. The biological ligand of F4/80 has not been identified, but it has been reported that F4/80 is required for induction of CD8+ T cells-mediated peripheral tolerance.

#### **Product Details**

 $\begin{tabular}{lll} Form & Liquid \\ Concentration & 0.5 mg/mL \\ Size & 25 \mu g/100 \mu g \\ Clone No. & CI:A3-1 \\ Host & Rat \\ \end{tabular}$ 

IsotypeRat IgG2b, κReactivityMouseApplicationFCM

**Isotype Control**Biotin Rat IgG2b, κ Isotype Control[LTF-2] [Product E-AB-F09843B]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Keep as concentrated solution.

Store at  $2\sim8$ °C .Do not freeze.

This product is guaranteed up to one year from purchase.

### Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is  $\leq 1.0 \,\mu g$  per  $10^6$  cells in 100  $\mu L$  volume or 100  $\mu L$  of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.
