FITC Anti-Human CD13 Antibody[B-F10]

Catalog No. E-AB-F1074C **Reactivity** Human **Storage** Store at 2~8°C, Avoid freeze / thaw cycles **Applications** FCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names Aminopeptidase N,ANPEP,AP-N,hAPN,Alanyl aminopeptidase,Aminopeptidase M,AP-

M, Microsomal aminopeptidase, gp150, CD13

Uniprot ID P15144

Background CD13 is a 150-170 kD type II transmembrane glycoprotein also known as aminopeptidase N,

APN, and gp150. This zinc metallopeptidase is expressed as a homodimer on granulocytes, myeloid progenitors, endothelial cells, epithelial cells and subset of granular lymphoid cells. It is not expressed on platelets or erythrocytes. CD13 is thought to be involved in the metabolism of many regulatory peptides and functions in antigen processing and the cleavage of chemokines

such as MIP-1. CD13 serves as the cellular receptor for Coronavirus.

Product Details

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. B-F10 Host Mouse

Isotype Mouse IgG1, κ

Reactivity Human **Application** FCM

Isotype Control FITC Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792C]

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

Fluorophore

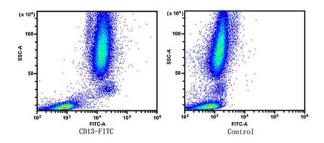

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

www.elabscience.com

Human peripheral blood lymphocytes, monocytes and granulocytes are stained with FITC Anti-Human CD13 Antibody (Left). Unstained Human peripheral blood lymphocytes, monocytes and granulocytes are used as control (Right).
