Elabscience®

Elab Fluor[®] 488 Anti-Human CD13 Antibody[B-F10]

Catalog No.E-AB-F1074LStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityHumanApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names	Aminopeptidase N, ANPEP, AP-N, hAPN, Alanyl aminopeptidase, Aminopeptidase M, AP-
	M,Microsomal aminopeptidase,gp150,CD13
Uniprot ID	P15144
Background	CD13 is a 150-170 kD type II transmembrane glycoprotein also known as aminopeptidase N,
	APN, and gp150. This zinc metallopeptidase is expressed as a homodimer on granulocytes,
	myeloid progenitors, endothelial cells, epithelial cells and subset of granular lymphoid cells. It is
	not expressed on platelets or erythrocytes. CD13 is thought to be involved in the metabolism of
	many regulatory peptides and functions in antigen processing and the cleavage of chemokines
	such as MIP-1. CD13 serves as the cellular receptor for Coronavirus.

Product Details

Form	Liquid
Size	20Tests/100Tests/100Tests×2
Clone No.	B-F10
Host	Mouse
Isotype	Mouse IgG1, ĸ
Reactivity	Human
Application	FCM
Isotype Control	Elab Fluor [®] 488 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792L]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

For Research Use Only

Thank you for your recent purchase. If you would like to learn more about antibodies, please visit www.elabscience.com. Focus on your research Service for life science

Applications:Activ- Activation; Block- Blocking; Separation- Cell Separation ; Cell Sep-Neg- Cell Separation by Negative Selection; FA-Functional Assay; Neut- Neutralization; Stim- Stimulation; FCM- Flow Cytometry; ICFCM: Intracellular Staining for Flow Cytometry; WB-Western Blotting; IHC- Immunohistochemistry; IF- Immunofluorescence; IP- Immunoprecipitation

Elabscience®

Fluorophore

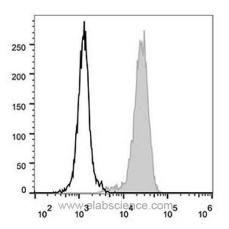

Conjugation: Elab Fluor[®] 488

Elab Fluor[®] 488 is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 520 nm (e.g., a 525/40 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

Human peripheral blood lymphocytes are stained with Elab Fluor[®] 488 Anti-Human CD13 Antibody (filled gray histogram). Unstained lymphocytes (empty black histogram) are used as control.
