# **Elabscience**®

# APC Anti-Mouse CD62L Antibody[Mel14]

Catalog No.E-AB-F1011EStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityMouseApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### **Antigen Information**

Alternate Names	L-selectin,Sell,CD62 antigen-like family member L,LAM-1,LECAM1,Lymph node homing receptor,Ly-22, CD62L,Lnhr,Ly22
Uniprot ID	P18337
Background	CD62L is a 74-95 kD glycoprotein also known as L-selectin, LECAM-1, Ly-22, LAM-1, and
	MEL-14. It is a member of the selectin family and is expressed on the majority of B and naïve T
	cells, a subset of memory T cells, monocytes, granulocytes, most thymocytes, and a subset of NK
	cells. CD62L is important in lymphocyte homing to high endothelial venules (HEV) in peripheral
	lymph nodes and leukocyte 'rolling' on activated endothelium. CD62L also contributes to
	neutrophil emigration at inflammatory sites. CD62L is rapidly shed from lymphocytes and
	neutrophils upon cellular activation and the expression levels of CD62L (in conjunction with
	other markers) have been used to distinguish naïve, effector, and memory T cells. CD62L has
	been reported to interact with CD34, GlyCAM-1, and MAdCAM-1.

### **Product Details**

Form	Liquid
Size	50Tests/100Tests/100Tests×2
Clone No.	Mel14
Host	Rat
Isotype	Rat IgG2a, κ
Reactivity	Mouse
Application	FCM
Isotype Control	APC Rat IgG2a, κ Isotype Control[2A3] [Product E-AB-F09832E]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

For Research Use Only

Thank you for your recent purchase. If you would like to learn more about antibodies, please visit www.elabscience.com. Focus on your research Service for life science

Applications:Activ- Activation; Block- Blocking; Separation- Cell Separation ; Cell Sep-Neg- Cell Separation by Negative Selection; FA-Functional Assay; Neut- Neutralization; Stim- Stimulation; FCM- Flow Cytometry; ICFCM: Intracellular Staining for Flow Cytometry; WB-Western Blotting; IHC- Immunohistochemistry; IF- Immunofluorescence; IP- Immunoprecipitation

# **Elabscience**®

# Fluorophore

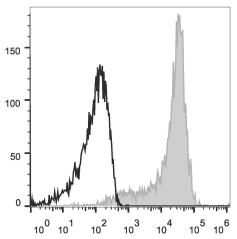

#### **Conjugation:** APC

APC is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

## **Product data**

C57BL/6 murine splenocytes are stained with APC Anti-Mouse CD62L Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
