# Elab Fluor® 488 Anti-Mouse CD162 Antibody[4RA10]

Catalog No.E-AB-F1034LReactivityMouseStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

Alternate Names Uniprot ID P-selectin glycoprotein ligand 1,Selplg,PSGL-1,Selectin P ligand,CD162

Q62170

**Background** The 4RA10 antibody reacts with the N-terminal functional peptide of CD162 (P-selectin

glycoprotein ligand-1, PSGL-1), encoded by the Selpl gene. PSGL-1 is expressed on the cell surface as a homodimer of approximately 230 kDa. In the mouse, Selpl mRNA is detected in most tissues, with high levels found in hematopoietic cells, brain, and adipose tissue. Flow cytometric analyses have revealed CD162 expression on bone marrow-derived mast and dendritic cells, splenic leukocytes, platelets, peripheral blood neutrophils, and neutrophil and T-cell lines. PSGL-1 is a ligand for P-selectin (CD62P) and is involved in leukocyte rolling, the migration of leukocytes into inflamed tissues, and responses to vascular injury. It is a sialomucin that must be specifically sialylated, fucosylated, and sulfated to bind P-selectin. There is also evidence that other ligands for PSGL-1 and CD62P may exist. 4RA10 mAb is reported to block the binding of mouse leukocytes to CD62P and CD62L.

### **Product Details**

**Application** 

Form Liquid

Size 50Tests/100Tests/100Tests×2

 Clone No.
 4RA10

 Host
 Rat

 Isotype
 Rat IgG1, κ

 Reactivity
 Mouse

Isotype Control Elab Fluor<sup>®</sup> 488 Rat IgG1, κ Isotype Control[HRPN] [Product E-AB-F09822L]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

**FCM** 

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

For Research Use Only

## **Fluorophore**

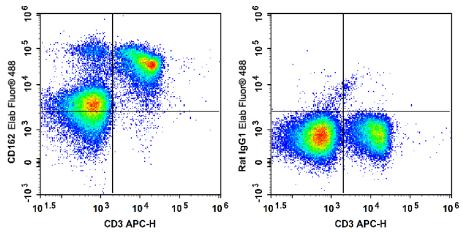

Conjugation: Elab Fluor® 488

Elab Fluor<sup>®</sup> 488 is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 520 nm (e.g., a 525/40 nm bandpass filter).

## Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 µL staining volume or per 100 µL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

C57BL/6 murine splenocytes are stained with APC Anti-Mouse CD3 Antibody and Elab Fluor® 488 Anti-Mouse CD162 Antibody (Left). Splenocytes are stained with APC Anti-Mouse CD3 Antibody and Elab Fluor® 488 Rat IgG1, κ Isotype Control (Right).
