Elabscience®

FITC Anti-Human CD57 Antibody[HNK-1]

Catalog No.E-AB-F1067CStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityHumanApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate NamesHNK-1, NK-1, Leu-7BackgroundCD57, also known as HNK-1, NK-1, and Leu-7 is a 100-115 kD oligosaccharide antigenic
determinant expressed on a variety of proteins, lipids, and chondroitin sulfate proteoglycans.
CD57 is expressed on a subset of peripheral blood lymphocytes, including NK cells and CD8+ T
cells, and is also expressed on neural cells and striated muscle. CD57 is not expressed on red
blood cells, granulocytes, monocytes, or platelets. While the function of CD57 is unknown,
binding to L-selectin, P-selectin, and a fragment of laminin suggests that CD57 may be involved
in cell-matrix interactions. CD57 is increased in some disease states associated with CD4/CD8
imbalances (AIDS, autoimmune disease, viral infections, and allograft transplants).

Product Details

_	
Form	Liquid
Size	20Tests/100Tests/100Tests×2
Clone No.	HNK-1
Host	Mouse
Isotype	Mouse IgM, ĸ
Reactivity	Human
Application	FCM
Isotype Control	FITC Mouse IgM, κ Isotype Control[MM-30] [Product E-AB-F09782C]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution.
	Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.
	This product is guaranteed up to one year from purchase.

For Research Use Only

Thank you for your recent purchase. If you would like to learn more about antibodies, please visit www.elabscience.com. Focus on your research Service for life science

Applications:Activ- Activation; Block- Blocking; Separation- Cell Separation ; Cell Sep-Neg- Cell Separation by Negative Selection; FA-Functional Assay; Neut- Neutralization; Stim- Stimulation; FCM- Flow Cytometry; ICFCM: Intracellular Staining for Flow Cytometry; WB-Western Blotting; IHC- Immunohistochemistry; IF- Immunofluorescence; IP- Immunoprecipitation

Elabscience®

Fluorophore

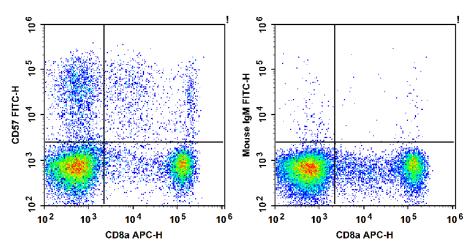

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

Human peripheral blood lymphocytes are stained with APC Anti-Human CD8a Antibody and FITC Anti-Human CD57 Antibody (Left). Lymphocytes are stained with APC Anti-Human CD8a Antibody and FITC Mouse IgM, κ Isotype Control (Right).
