# APC Anti-Human CD45 Antibody[HI30]

Catalog No.E-AB-F1137EReactivityHumanStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

Alternate Names Uniprot ID Receptor-type tyrosine-protein phosphatase C,Ptprc,L-CA,Ly-5,T200,CD45

P08575

**Background** CD45 is a 180 - 240 kD single chain type I membrane glycoprotein also known as leukocyte

common antigen (LCA) and T200. It is a tyrosine phosphatase expressed on the plasma membrane of all hematopoietic cells, except erythrocytes or platelets. CD45 is a signaling molecule that regulates a variety of cellular processes including cell growth, differentiation, cell cycle, and oncogenic transformation. CD45 plays a critical role in T and B cell antigen receptor-mediated activation by dephosphorylating substrates including p56Lck, p59Fyn, and other Src family kinases. CD45 non-covalently associates with lymphocyte phosphatase-associated phosphoprotein (LPAP) on T and B lymphocytes. CD45 has been reported to bind galectin-1 and to be associated with several other cell surface antigens including CD1, CD2, CD3, and CD4.

### **Product Details**

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. HI30 Host Mouse

**Isotype** Mouse IgG1, κ

**Reactivity** Human **Application** FCM

**Isotype Control** APC Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792E]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

## **Fluorophore**

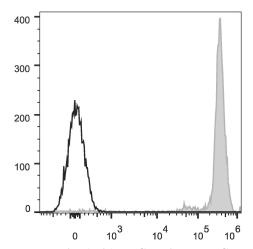

Conjugation: APC

APC is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

### Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

### **Product data**

Human peripheral blood lymphocytes are stained with APC Anti-Human CD45 Antibody (filled gray histogram). Unstained lymphocytes (empty black histogram) are used as control.
