PE/Cyanine5 Anti-Human CD27 Antibody[O323]

Catalog No.E-AB-F1140GReactivityHumanStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names CD27L receptor, T-cell activation antigen CD27, T14, S152, TNFRSF7

Uniprot ID P2684

Background CD27 is a 50-55 kD type I membrane protein also known as S152 and T14. It is a lymphocyte-

specific member of the TNF-receptor superfamily. CD27 is expressed on medullary thymocytes, virtually all mature T cells, some B cells, and NK cells. CD27 binds to CD70 and plays an important role in costimulation of T cell activation, and regulation of B cell differentiation and proliferation. The cytoplasmic domains of CD27 have also been shown to interact with TRAF2

and TRAF5 to elicit NF-κB and SAPK/JNK activation.

Product Details

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. O323 Host Mouse

Isotype Mouse IgG1, κ

Reactivity Human **Application** FCM

Isotype Control [Product E-AB-F09792G]

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

Fluorophore

Conjugation: PE/Cyanine5

PE/Cyanine5 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 670 nm (e.g., a 690/50 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
