## FITC Anti-Human/Mouse CD44 Antibody[IM7]

Catalog No. E-AB-F1100C Reactivity Human, Mouse

Storage **Applications FCM** Store at 2~8°C, Avoid freeze / thaw cycles

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

**Alternate Names** CD44 antigen, CD44, CDw44, Epican, Phagocytic glycoprotein 1, PGP-1, Phagocytic glycoprotein

I,PGP-I,CD44,LHR, MDU2, MDU3, MIC4

**Uniprot ID** P15379,P16070

**Background** CD44 is a 80-95 kD glycoprotein also known as Hermes, Pgp1, H-CAM, or HUTCH. It is

> expressed on all leukocytes, endothelial cells, hepatocytes, and mesenchymal cells. As B and T cells become activated or progress to the memory stage, CD44 expression increases from low or mid levels to high levels. Thus, CD44 has been reported to be a valuable marker for memory cell subsets. High CD44 expression on Treg cells has been associated with potent suppressive function via high production of IL-10. CD44 is an adhesion molecule involved in leukocyte attachment to and rolling on endothelial cells, homing to peripheral lymphoid organs and to the sites of

inflammation, and leukocyte aggregation.

### **Product Details**

**Form** Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. IM7 Host Rat

Rat IgG2b, κ **Isotype** Reactivity Human, Mouse

**Application FCM** 

**Isotype Control** FITC Rat IgG2b, κ Isotype Control[LTF-2] [Product E-AB-F09842C]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# **Fluorophore**

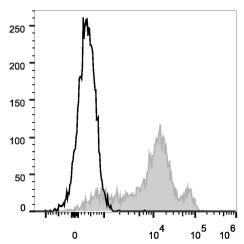

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

### Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 µL staining volume or per 100 µL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

### **Product data**

C57BL/6 murine splenocytes are stained with FITC Anti-Human/Mouse CD44 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
