APC Anti-Mouse CD54 Antibody[YN1/1.7.4]

Catalog No. E-AB-F1018UE Reactivity Mouse Storage **Applications FCM** Store at 2~8°C, Avoid freeze / thaw cycles

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names Uniprot ID

Intercellular adhesion molecule 1,Icam1,MALA-2,MyD10,CD54,Icam-1

Background CD54 is a 90 kD immunoglobulin superfamily member also known as ICAM-1 and Ly-47. It is

> expressed on activated endothelial cells, high endothelial venules (HEV), T and B cells, monocytes/ macrophages, granulocytes, and dendritic cells. CD54 is an important intracellular adhesion molecule that participates in T cell-T cell, T cell-B cell, and T cell-target cell interactions via binding of LFA-1 (CD11a/CD18) and Mac-1 (CD11b/CD18). CD54 has also been shown to be involved in lymphocyte trafficking, making it an important molecule in many immune reactions and inflammation. CD54 is also a receptor for rhinovirus. The YN1/1.7.4 antibody has been reported to block binding of mouse CD54 to LFA-1 and Mac-1, inhibit cell-

cell adhesion, and function in antigen presentation to T cells and leukocyte migration to

inflammatory tissues.

Product Details

Form Liquid Concentration 0.2 mg/mL Size 25µg/100µg Clone No. YN1/1.7.4 Host

Isotype Rat IgG2b, κ Reactivity Mouse **Application FCM**

Isotype Control APC Rat IgG2b, κ Isotype Control[LTF-2] [Product E-AB-F09843E]

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

For Research Use Only

Thank you for your recent purchase

Fluorophore

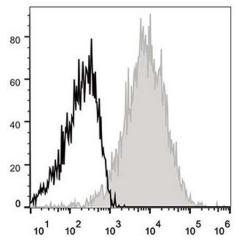

Conjugation: APC

APC is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is $0.1-1 \,\mu g/10^6$ cells in $100 \,\mu L$ volume].

Product data

C57BL/6 murine splenocytes are stained with APC Anti-Mouse CD54 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.
