APC Anti-Mouse CD366/Tim-3 Antibody[RMT3-23]

E-AB-F1192UE Reactivity Catalog No. Mouse **Applications FCM Storage** Store at 2~8°C, Avoid freeze / thaw cycles

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names TIM3, TIMD3, HAVcr-2, TIMD-3

Uniprot ID Q8VIM0

Background CD366 (Tim-3) is a transmembrane protein also known as T cell immunoglobulin and mucin

> domain containing protein-3. Tim-3 is expressed at high levels on activated T cells (preferentially on Th1 cells, monocytes/macrophages, and dendritic cells). Tim-3 has also been shown to exist as a soluble protein. Cells expressing Tim-3 are present at high levels in the CNS of animals at the onset of experimental autoimmune encephalomyelitis (EAE), a disease mediated by lymphocytes secreting Th1-like cytokines. Tim-3 has been proposed to inhibit Th1-mediated immune

responses and promote immunological tolerance.

Product Details

Form Liquid Concentration 0.2 mg/mL $25 \mu g / 100 \mu g$ Size Clone No. RMT3-23 Host Rat

Rat IgG2a, κ **Isotype** Mouse Reactivity **Application FCM**

APC Rat IgG2a, κ Isotype Control[2A3] [Product E-AB-F09833E] **Isotype Control**

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

Fluorophore

Conjugation: APC

APC is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 µg/10⁶ cells in 100 μL volume].
