# APC Anti-Human/Mouse IL-5 Antibody[TRFK5]

Catalog No.E-AB-F1205UEReactivityHuman, MouseStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsICFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

Alternate Names Uniprot ID Interleukin-5,IL-5,B-cell differentiation factor I,T-cell replacing factor,TRF

P05113,P04401

**Background** IL-5 is a homodimeric, disulphide-linked protein produced by T-cells. Monomeric human IL-5 is

a 126 amino acid protein with a reported molecular weight of 26 kD for the homodimeric protein. Mouse and human IL-5 are approximately 70% identical. IL-5 has been shown to promote the

growth of immature hematopoietic BFU-E progenitors, stimulate the activation and

differentiation of eosinophils, and promote the generation of cytotoxic lymphocytes. Mouse IL-5 induces the differentiation and proliferation of pre-activated B-cells and stimulates the production

and secretion of IgM and IgA by B-cells stimulated with bacterial endotoxin. The TRFK5

antibody can neutralize the bioactivity of natural or recombinant IL-5.

#### **Product Details**

 Form
 Liquid

 Concentration
 0.2 mg/mL

 Size
 25μg/100μg

 Clone No.
 TRFK5

 Host
 Rat

 Isotype
 Rat IsG1 κ

IsotypeRat IgG1, κReactivityHuman, MouseApplicationICFCM

**Isotype Control**APC Rat IgG1, κ Isotype Control[HRPN] [Product E-AB-F09823E]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# **Fluorophore**

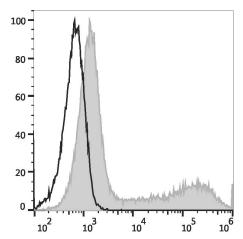

Conjugation: APC

APC is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

## Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 µg/10<sup>6</sup> cells in 100 μL volume].

#### **Product data**

HEK293T cells transiently transfected with pcDNA3.1 plasmid encoding Mouse IL-5 gene are stained with APC Anti-Human/Mouse IL-5 Antibody (filled gray histogram) or APC Rat IgG1, κ Isotype Control (empty black histogram).
