Elab Fluor® 488 Anti-Human CD10 Antibody[CB-CALLA]

Catalog No. E-AB-F1078L **Reactivity** Human **Storage** Store at 2~8°C, Avoid freeze / thaw cycles **Applications** FCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names Neprilysin,MME,CALLA,NEP,Neutral endopeptidase,SFE,CD10

Uniprot ID P08473

Background CD10 is a 100 kD neutral endopeptidase and a member of the metalloprotease family. It is a type

II transmembrane protein also known as common acute lymphoblastic leukemia antigen (CALLA), enkephalinase, and neprilysin. CD10 is expressed on B cell precursors, T cell

precursors, and neutrophils. CD10 is involved in B cell development and has been shown to bind opioid enkephalins, bradykinin, angiotensins I and II, and other biologically active peptides.

Product Details

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. CB-CALLA Host Mouse

Isotype Mouse IgG1, κ

Reactivity Human **Application** FCM

Isotype ControlElab Fluor® 488 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792L]Storage BufferPhosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

Fluorophore

Conjugation: Elab Fluor® 488

Elab Fluor[®] 488 is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 520 nm (e.g., a 525/40 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
