# **RPS27A Polyclonal Antibody**

Catalog No.E-AB-52819ReactivityH,M,RStorageStore at -20°C. Avoid freeze / thaw cycles.HostRabbitApplicationsIHC,ELISAIsotypeIgG

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Images**

Immunohistochemistry of paraffinembedded Human esophagus cancer tissue using RPS27A Polyclonal Antibody at dilution of 1:35(×200)

Immunohistochemistry of paraffinembedded Human cervical cancer tissue using RPS27A Polyclonal Antibody at dilution of 1:35(×200)

### **Immunogen Information**

Immunogen Fusion protein of human RPS27A

**Gene Accession** BC001392 **Swissprot** P62979

**Synonyms** 40S ribosomal protein S27a,CEP 80,CEP80,RPS

27A,UBA 80,UBA80,UBCEP 1,UBCEP 80,UBCEP1

#### **Product Information**

**Buffer** PBS with 0.05% NaN3 and 40% Glycerol,pH7.4

**Purify** Antigen affinity purification

**Dilution** IHC 1:30-1:150, ELISA 1:5000-1:10000

### **Background**

Ubiquitin, a highly conserved protein that has a major role in targeting cellular proteins for degradation by the 26S proteosome, is synthesized as a precursor protein consisting of either polyubiquitin chains or a single ubiquitin fused to an unrelated protein. This gene encodes a fusion protein consisting of ubiquitin at the N terminus and ribosomal protein S27a at the C terminus. When expressed in yeast, the protein is posttranslationally processed, generating free ubiquitin monomer and ribosomal protein S27a. Ribosomal protein S27a is a component of the 40S subunit of the ribosome and belongs to the S27AE family of ribosomal proteins. It contains C4-type zinc finger domains and is located in the cytoplasm. Pseudogenes derived from this gene are present in the genome. As with ribosomal protein S27a, ribosomal protein L40 is also synthesized as a fusion protein with ubiquitin; similarly, ribosomal protein S30 is synthesized as a fusion protein with the ubiquitin-like protein fubi. Multiple alternatively spliced transcript variants that encode the same proteins have been identified.
