# **IFNB1 Polyclonal Antibody**

Catalog No.E-AB-53491ReactivityHStorageStore at -20°C. Avoid freeze / thaw cycles.HostRabbitApplicationsIHC,ELISAIsotypeIgG

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

# **Images**

Immunohistochemistry of paraffinembedded Human brain tissue using IFNB1 Polyclonal Antibody at dilution of 1:45(×200)

Immunohistochemistry of paraffinembedded Human lung cancer tissue using IFNB1 Polyclonal Antibody at dilution of 1:45(×200)

# **Immunogen Information**

Immunogen Synthetic peptide of human IFNB1

**Gene Accession** NP002167 **Swissprot** P01574

**Synonyms** IFB,IFF,IFN beta,IFN-beta,IFNB

1,IFNB,IFNB,IFNB1,Interferon beta 1 fibroblast

#### **Product Information**

**Buffer** PBS with 0.05% NaN3 and 40% Glycerol,pH7.4

**Purify** Antigen affinity purification

**Dilution** IHC 1:30-1:150, ELISA 1:5000-1:10000

# **Background**

This gene encodes a cytokine that belongs to the interferon family of signaling proteins, which are released as part of the innate immune response to pathogens. The protein encoded by this gene belongs to the type I class of interferons, which are important for defense against viral infections. In addition, type I interferons are involved in cell differentiation and anti-tumor defenses. Following secretion in response to a pathogen, type I interferons bind a homologous receptor complex and induce transcription of genes such as those encoding inflammatory cytokines and chemokines. Overactivation of type I interferon secretion is linked to autoimmune diseases. Mice deficient for this gene display several phenotypes including defects in B cell maturation and increased susceptibility to viral infection.
