# APC Anti-Mouse CD51 Antibody[RMV-7]

Catalog No.E-AB-F1235UEReactivityMouseStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### **Antigen Information**

Alternate Names Uniprot ID Integrin alpha-V,αV integrin,Vitronectin Receptor,Integrin αV chain,ITGAV

P43406

**Background** CD51 is a 140 kD protein, also known as  $\alpha V$  integrin, vitronectin receptor, and integrin  $\alpha V$ . It is a

member of the integrin family, expressed on activated T cells, polymorphonuclear granulocytes, platelets, blastocysts, and osteoclasts. CD51 forms heterodimers by association with integrins  $\beta$ 1,  $\beta$ 3,  $\beta$ 5 or  $\beta$ 6; these complexes then act as receptors for multiple extracellular matrix proteins (ECM). The  $\alpha$ vintegrin heterodimers have varied functions in development, stimulation/activation and homeostasis. The primary ligands for CD51 complexes are fibronectin, fibrinogen,

and homeostasis. The primary ligands for CD51 complexes are fibronectin, fibrinogen, vitronectin, thrombspondin, von Willebrand factor, and CD31. The RMV-7 antibody has been reported to block binding of CD51 to vitronectin, fibronectin, and CD31 in some cell types, as

well as blocking LAK cell cytotoxicity.

#### **Product Details**

 Form
 Liquid

 Concentration
 0.2 mg/mL

 Size
 25μg/100μg

 Clone No.
 RMV-7

 Host
 Rat

 Isotype
 Rat IgG1 κ

IsotypeRat IgG1, κReactivityMouseApplicationFCM

Isotype Control APC Rat IgG1, κ Isotype Control[HRPN] [Product E-AB-F09823E]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

## **Fluorophore**

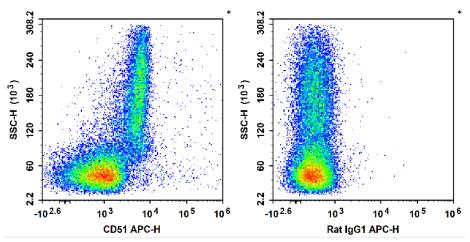

Conjugation: APC

APC is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

# **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1  $\mu g/10^6$  cells in  $100~\mu L$  volume].

#### **Product data**

C57BL/6 murine bone marrow cells are stained with APC Anti-Mouse CD51 Antibody (Left). Bone marrow cells are stained with APC Rat IgG1,  $\kappa$  Isotype Control (Right).
