

APC Anti-Human CD57 Antibody[TB01]

Catalog No.	E-AB-F1237E	Reactivity	Human
Storage	Store at 2~8°C, Avoid freeze / thaw cycles	Applications	FCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names	Galactosylgalactosylxylosylprotein 3-beta-glucuronosyltransferase 1,B3GAT1,GlcAT-P,GlcUAT-P,GLCATP
Background	CD57, also known as TB01, NK-1, and Leu-7 is a 100-115 kD oligosaccharide antigenic determinant expressed on a variety of proteins, lipids, and chondroitin sulfate proteoglycans. CD57 is expressed on a subset of peripheral blood lymphocytes, including NK cells and CD8+ T cells, and is also expressed on neural cells and striated muscle. CD57 is not expressed on red blood cells, granulocytes, monocytes, or platelets. While the function of CD57 is unknown, binding to L-selectin, P-selectin, and a fragment of laminin suggests that CD57 may be involved in cell-matrix interactions. CD57 is increased in some disease states associated with CD4/CD8 imbalances (AIDS, autoimmune disease, viral infections, and allograft transplants).

Product Details

Form	Liquid
Size	20Tests/50Tests/100Tests/200Tests
Clone No.	TB01
Host	Mouse
Isotype	Mouse IgM, κ
Reactivity	Human
Application	FCM
Isotype Control	APC Mouse IgM, κ Isotype Control[MM-30] [Product E-AB-F09782E]
Storage Buffer	PBS with 0.05% Proclin300, 1% BSA
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light.Do not freeze. This product is guaranteed up to one year from purchase.

For Research Use Only

Thank you for your recent purchase.

Applications:Activ- Activation; Block- Blocking; Separation- Cell Separation ; Cell Sep-Neg- Cell Separation by Negative Selection; FA- Functional Assay; Neut- Neutralization; Stim- Stimulation; FCM- Flow Cytometry; ICFCM: Intracellular Staining for Flow Cytometry; WB- Western Blotting; IHC- Immunohistochemistry; IF- Immunofluorescence; IP- Immunoprecipitation

Fluorophore

Conjugation: APC

Recommended usage

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 µL staining volume or per 100 µL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

Human peripheral blood lymphocytes are stained with APC Anti-Human CD57 Antibody (filled gray histogram). Unstained lymphocytes (empty black histogram) are used as control.
