FBXO32 Polyclonal Antibody

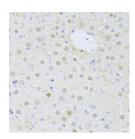

Catalog No. E-AB-67565 Reactivity M,R Store at -20°C. Avoid freeze / thaw cycles. **Storage** Host Rabbit **Applications** WB,IHC **Isotype IgG**

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Images

Western blot analysis of extracts of various cell lines using FBXO32 Polyclonal Antibody.

Immunohistochemistry of paraffinembedded Rat liver using FBXO32 Polyclonal Antibody at dilution of 1:100 (40x lens).

Immunogen Information

Immunogen Recombinant fusion protein of human FBXO32

(NP_478136.1).

GeneID 114907 **Swissprot** Q969P5

Synonyms FBXO32,Fbx32,MAFbx

Product Information

Calculated MW 27kDa/42kDa

Observed MW 45kDa

Buffer PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Purify Affinity purification

Dilution WB 1:1000-1:2000 IHC 1:50-1:200

Background

This gene encodes a member of the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The Fbox proteins constitute one of the four subunits of the ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes: Fbws containing WD-40 domains, Fbls containing leucinerich repeats, and Fbxs containing either different protein-protein interaction modules or no recognizable motifs. The protein encoded by this gene belongs to the Fbxs class and contains an F-box domain. This protein is highly expressed during muscle atrophy, whereas mice deficient in this gene were found to be resistant to atrophy. This protein is thus a potential drug target for the treatment of muscle atrophy. Alternative splicing results in multiple transcript variants encoding different isoforms.
