ALDOA Polyclonal Antibody

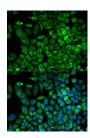

E-AB-60207 Catalog No. Reactivity H,M,R Store at -20°C. Avoid freeze / thaw cycles. Rabbit **Storage** Host **Applications** WB.IF **Isotype IgG**

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Images

Western blot analysis of extracts of various cell lines using ALDOA Polyclonal Antibody at dilution of 1:1000.

Immunofluorescence analysis of A549 cells using ALDOA Polyclonal Antibody

Immunogen Information

Immunogen Recombinant fusion protein of human ALDOA

(NP_908930.1).

GeneID 226 **Swissprot** P04075

Synonyms ALDOA, ALDA, GSD12, HEL-S-87p

Product Information

Calculated MW 39kDa/45kDa

Observed MW 43kDa

Buffer PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Purify Affinity purification

Dilution WB 1:500-1:2000 IF 1:20-1:100

Background

The protein encoded by this gene, Aldolase A (fructose-bisphosphate aldolase), is a glycolytic enzyme that catalyzes the reversible conversion of fructose-1,6-bisphosphate to glyceraldehyde 3-phosphate and dihydroxyacetone phosphate. Three aldolase isozymes (A, B, and C), encoded by three different genes, are differentially expressed during development. Aldolase A is found in the developing embryo and is produced in even greater amounts in adult muscle. Aldolase A expression is repressed in adult liver, kidney and intestine and similar to aldolase C levels in brain and other nervous tissue. Aldolase A deficiency has been associated with myopathy and hemolytic anemia. Alternative splicing and alternative promoter usage results in multiple transcript variants. Related pseudogenes have been identified on chromosomes 3 and 10.
