Anti-MERS-CoV Nucleoprotein/NP Polyclonal Antibody

E-AB-V1284

Application ELISA Host Rabbit

Storage Store at -20°C. Avoid freeze / thaw cycles.

Important Note Centrifuge before opening to ensure complete recovery of vial contents.

Product Details

Immunogen Recombinant MERS-CoV Nucleoprotein / NP protein (His Tag)

IsotypeIgGHostRabbitReactivityMERS-CoV

Dilution ELISA 1:1000-1:2000

Storage Buffer0.2 μm filtered solution in PBSStability & StorageShips on ice packs. Store at -20°C

Description This antibody was produced in rabbits immunized with purified Recombinant MERS-CoV

Nucleoprotein / NP protein (His Tag). And the antibody was purified by Protein A affinity

chromatography..

Antigen Infomation

Alternate Names coronavirus NP,coronavirus Nucleocapsid,coronavirus Nucleoprotein,cov np,ncov NP,novel

coronavirus Nucleoprotein, NP, Nucleocapsid, Nucleoprotein

Background Coronaviruses are enveloped viruses with a positive-sense RNA genome and with a nucleocapsid

of helical symmetry. Coronavirus nucleoproteins localize to the cytoplasm and the nucleolus, a subnuclear structure, in both virus-infected primary cells and in cells transfected with plasmids that express N protein. Coronavirus N protein is required for coronavirus RNA synthesis, and has RNA chaperone activity that may be involved in template switch. Nucleocapsid protein is a most abundant protein of coronavirus. During virion assembly, N protein binds to viral RNA and leads to formation of the helical nucleocapsid. Nucleocapsid protein is a highly immunogenic phosphoprotein also implicated in viral genome replication and in modulating cell signaling pathways. Because of the conservation of N protein sequence and its strong immunogenicity, the

N protein of coronavirus is chosen as a diagnostic tool.
