Anti-Zika virus(ZIKV)(strain Zika SPH2015) ZIKV-E/Envelope protein(Domain III) Monoclonal Antibody

E-AB-V1335

ApplicationWBHostRabbitStorageStore at -20°C. Avoid freeze / thaw cycles.Clone No.101

Important Note Centrifuge before opening to ensure complete recovery of vial contents.

Product Details

Immunogen Recombinant ZIKV E / Envelope protein (Domain III, His Tag)

IsotypeIgGHostRabbitClone No.101

Reactivity Zika Virus

Dilution WB 1:2000-1:10000

Storage Buffer 0.2 μm filtered solution in PBS Stability & Storage Ships on ice packs. Store at -20°C

Description This antibody was obtained from a rabbit immunized with purified Recombinant ZIKV E /

Envelope protein (Domain III, His Tag). And the antibody was purified by Protein A Affinity.

Antigen Infomation

Alternate Names E,Envelope Protein

Background Envelope of Zika virus is resposible for receptor binding and membrane. Analysis of the

envelope protein of Zika, from Brazilian Zika SPH215 (KU321639), indicates predicted B and T cell epitopes in peptides that are consistent to those reported for dengue, YFYF and Japanese encephalitis. The envelope Domain II B cell epitope, to which much dengue non-neutralizing cross reaction is attributed, is also conserved also in Zika virus, consistent with prior field observations of cross reactivity with dengue and YF. Domain III of the Zika envelope protein, likely the main specific neutralizing domain, is distinct from recent Brazilian dengue isolates and a recent Peruvian YF isolate (GQ379163), 76% of possible major histocompatibility complex class (MHC) I and MHC II binding peptides and potential B cell linear epitopes are unique to Zika virus.

For Research Use Only
