Elab Fluor® 647 Anti-Mouse IL-17A Antibody[TC11-18H10.1]

Catalog No.E-AB-F1199MReactivityMouseStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsICFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names Uniprot ID $Interleuk in \hbox{-} 17A, IL\hbox{-} 17A, Cytotoxic T-lymphocyte-associated antigen 8, CTLA-8, CTLA$

Q62386

Background IL-17, also known as CTLA-8, is a T cell-expressed pleiotropic cytokine that exhibits a high

degree of homology to a protein encoded by the ORF13 gene of herpes virus Saimiri. IL-17 is produced by Th cells (Th17) that are distinct from the traditional Th1- and Th2-cell subsets. IL-23 plays an important role in triggering IL-17 production. Both recombinant and natural IL-17 have been shown to exist as disulfide linked homodimers. IL-17 exhibits multiple biological activities on a variety of cells including: the induction of IL-6 and IL-8 production in fibroblasts, activation of NF-κB, and costimulation of T cell proliferation. IL-17 is an essential inflammatory mediator in the development of autoimmune diseases. Neutralization of IL-17 with monoclonal

antibody is able to ameliorate the disease course.

Product Details

Form Liquid

Size 50Tests/100Tests/100Tests×2

Clone No. TC11-18H10.1

Host Rat

 $\begin{array}{ll} \textbf{Isotype} & \text{Rat IgG1, } \kappa \\ \textbf{Reactivity} & \text{Mouse} \\ \textbf{Application} & \text{ICFCM} \\ \end{array}$

Isotype Control Elab Fluor[®] 647 Rat IgG1, κ Isotype Control[HRPN] [Product E-AB-F09822M]

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

Fluorophore

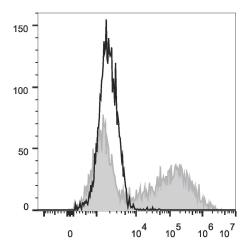

Conjugation: Elab Fluor® 647

Elab Fluor® 647 is designed to be excited by the Red laser (627-640 nm) and detected using an optical filter centered near 670 nm (e.g., a 660/20 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 µL staining volume or per 100 µL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

HEK293T cells transiently transfected with pcDNA3.1 plasmid encoding Mouse IL-17A gene are stained with Elab Fluor[®] 647 Anti-Mouse IL-17A Antibody (filled gray histogram) or Elab Fluor[®] 647 Rat IgG1, κ lsotype Control (empty black histogram).
