

M199 (with PS)

Cat. No:	PM150610A
Size:	500mL

General Information

Product Form	Liquid
Concentration	1×
pH	7.2-7.4
D-glucose	1000mg/L
HEPES	Negative
L-glutamine	100mg/L
NaHCO ₃	2200mg/L
Phenol red	20mg/L
Balanced salt	Earle's salt
Streptomycin sulfate	100mg/L
Penicillin G	100kU/L
Storage	2-8°C, Shading light
Shipping	Ice bag
Expiration date	12 months

Background

M199 (Medium 199) originally used in nutritional studies of chicken embryo fibroblasts, it has been widely used in the culture of various animal cells, including some non-mammalian cells. M199 is especially suitable for the culture of untransformed cells, rat pancreatic epithelial cells and mouse lens tissues, also used in virology and vaccine production. Compared with other basic medium, M199 contains unique ingredients, including adenine, adenosine, hypoxanthine, thymine, and other vitamins. There are two kinds of equilibrium salt (earle's salt and hank's salt) in M199. Earle's salt is often used in CO₂ environment, hank's salt is used in non-CO₂ environment. This product contains many kinds of amino acids, vitamins, inorganic salts and other ingredients for cell culture, but does not contain protein, lipids or any growth factors. Therefore, the product should be used with serum or serum-free additives.

Notes

1. This product is for research use only.
2. This product is sterilized by 0.22 μm filtration.
3. It is necessary to pay attention to the aseptic operation and avoid the pollution during the culture.
