# **THPO Polyclonal Antibody**

Catalog No. E-AB-60463 Reactivity H,M Store at -20°C. Avoid freeze / thaw cycles. Rabbit **Storage** Host **Applications Isotype** IgG

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

# **Images**

Western blot analysis of extracts of various cell lines using THPO Polyclonal Antibody at dilution of 1:1000.

# **Immunogen Information**

**Immunogen** Recombinant fusion protein of human THPO

(NP\_001171068.1).

GeneID 7066 **Swissprot** P40225

THPO,MGDF,MKCSF,ML,MPLLG,THCYT1,TPO **Synonyms** 

#### **Product Information**

Calculated MW 33kDa/37kDa

**Observed MW** 32kDa

**Buffer** PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

**Purify** Affinity purification Dilution WB 1:500-1:2000

# **Background**

Megakaryocytopoiesis is the cellular development process that leads to platelet production. The main functional protein encoded by this gene is a humoral growth factor that is necessary for megakaryocyte proliferation and maturation, as well as for thrombopoiesis. This protein is the ligand for MLP/C\_MPL, the product of myeloproliferative leukemia virus oncogene. Mutations in this gene are the cause of thrombocythemia 1. Alternative promoter usage and differential splicing result in multiple transcript variants differing in the 5' UTR and/or coding region. Multiple AUG codons upstream of the main open reading frame (ORF) have been identified, and these upstream AUGs inhibit translation of the main ORF at different extent.
