

ABAT Polyclonal Antibody

Catalog No.	E-AB-60880	Reactivity	H,M,R
Storage	Store at -20°C. Avoid freeze / thaw cycles.	Host	Rabbit
Applications	WB,IF	Isotype	IgG

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Images

Western blot analysis of extracts of various cell lines using GABA transaminase (GABA transaminase (ABAT)) Polyclonal Antibody at 1:1000 dilution.

Western blot analysis of extracts of HepG2 cells using GABA transaminase (GABA transaminase (ABAT)) Polyclonal Antibody at 1:1000 dilution.

Immunofluorescence analysis of mouse brain using GABA transaminase (GABA transaminase (ABAT)) Polyclonal antibody at dilution of 1:100 (40x lens). Blue: DAPI for nuclear staining.

Immunogen Information

Immunogen	Recombinant fusion protein of human ABAT
GeneID	18
Swissprot	P80404
Synonyms	ABAT,GABA-AT,GABAT,NPD009

Product Information

Calculated MW	56kDa
Observed MW	50kDa
Buffer	PBS with 0.01% thiomersal,50% glycerol,pH7.3.
Purify	Affinity purification
Dilution	WB 1:500-1:2000,IF 1:50-1:200

Background

4-aminobutyrate aminotransferase (ABAT) is responsible for catabolism of gamma-aminobutyric acid (GABA), an important, mostly inhibitory neurotransmitter in the central nervous system, into succinic semialdehyde. The active enzyme is a homodimer of 50-kD subunits complexed to pyridoxal-5-phosphate. The protein sequence is over 95% similar to the pig protein. GABA is estimated to be present in nearly one-third of human synapses. ABAT in liver and brain is controlled by 2 codominant alleles with a frequency in a Caucasian population of 0.56 and 0.44. The ABAT deficiency phenotype includes psychomotor retardation, hypotonia, hyperreflexia, lethargy, refractory seizures, and EEG abnormalities. Multiple alternatively spliced transcript variants encoding the same protein isoform have been found for this gene.
