

## DDX20 Polyclonal Antibody

<b>Catalog No.</b>	E-AB-61130	<b>Reactivity</b>	H,M,R
<b>Storage</b>	Store at -20°C. Avoid freeze / thaw cycles.	<b>Host</b>	Rabbit
<b>Applications</b>	WB,IF	<b>Isotype</b>	IgG

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Images

Western blot analysis of extracts of various cell lines using DDX20 Polyclonal Antibody at 1:1000 dilution.

Immunofluorescence analysis of HeLa cells using DDX20 Polyclonal Antibody Blue: DAPI for nuclear staining.

### Immunogen Information

<b>Immunogen</b>	Recombinant fusion protein of human DDX20
<b>GeneID</b>	11218
<b>Swissprot</b>	Q9UHI6
<b>Synonyms</b>	DDX20,DP103,GEMIN3

### Product Information

<b>Calculated MW</b>	14kDa/92kDa
<b>Observed MW</b>	110kDa
<b>Buffer</b>	PBS with 0.02% sodium azide,50% glycerol,pH7.3.
<b>Purify</b>	Affinity purification
<b>Dilution</b>	WB 1:500-1:2000,IF 1:10-1:100

### Background

DEAD box proteins, characterized by the conserved motif Asp-Glu-Ala-Asp (DEAD), are putative RNA helicases. They are implicated in a number of cellular processes involving alteration of RNA secondary structure such as translation initiation, nuclear and mitochondrial splicing, and ribosome and spliceosome assembly. Based on their distribution patterns, some members of this family are believed to be involved in embryogenesis, spermatogenesis, and cellular growth and division. This gene encodes a DEAD box protein, which has an ATPase activity and is a component of the survival of motor neurons (SMN) complex. This protein interacts directly with SMN, the spinal muscular atrophy gene product, and may play a catalytic role in the function of the SMN complex on RNPs.

#### For Research Use Only

Thank you for your recent purchase.
