

## NDUFV2 Polyclonal Antibody

|                     |   |                   |        |
|---------------------|---|-------------------|--------|
| <b>Catalog No.</b>  | E-AB-61707                                  | <b>Reactivity</b> | H,M,R  |
| <b>Storage</b>      | Store at -20°C. Avoid freeze / thaw cycles. | <b>Host</b>       | Rabbit |
| <b>Applications</b> | WB  | <b>Isotype</b>    | IgG    |

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Immunogen Information

|                  |  |
|------------------|--|
| <b>Immunogen</b> | Recombinant fusion protein of human NDUFV2 |
| <b>GeneID</b>    | 4729                                       |
| <b>Swissprot</b> | P19404                                     |
| <b>Synonyms</b>  | NDUFV2,CI-24k                              |

### Product Information

|                      |   |
|----------------------|---|
| <b>Calculated MW</b> | 27kDa   |
| <b>Observed MW</b>   | 27kDa   |
| <b>Buffer</b>        | PBS with 0.02% sodium azide,50% glycerol,pH7.3. |
| <b>Purify</b>        | Affinity purification                           |
| <b>Dilution</b>      | WB 1:500-1:2000                                 |

### Background

The NADH-ubiquinone oxidoreductase complex (complex I) of the mitochondrial respiratory chain catalyzes the transfer of electrons from NADH to ubiquinone, and consists of at least 43 subunits. The complex is located in the inner mitochondrial membrane. This gene encodes the 24 kDa subunit of complex I, and is involved in electron transfer. Mutations in this gene are implicated in Parkinson's disease, bipolar disorder, schizophrenia, and have been found in one case of early onset hypertrophic cardiomyopathy and encephalopathy. A non-transcribed pseudogene of this locus is found on chromosome 19.

### For Research Use Only

Thank you for your recent purchase.
