DCX Polyclonal Antibody

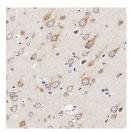

Catalog No.E-AB-70186ReactivityM,RStorageStore at -20°C. Avoid freeze / thaw cycles.HostRabbitApplicationsIHCIsotypeIgG

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Images

Immunohistochemistry analysis of paraffin-embedded mouse brain using DCX Polyclonal Antibody at dilution of 1:400.

Immunohistochemistry analysis of paraffin-embedded Rat brain using DCX Polyclonal Antibody at dilution of 1:400.

Immunogen Information

Immunogen KLH conjugated Synthetic peptide corresponding to

Mouse DCX

Swissprot O88809,Q9ESI7

Synonyms DCX, DBCN, DC, LISX, SCLH, XLIS, doublecortin

Product Information

Buffer PBS with 0.02% sodium azide, 1% protective protein

and 50% glycerol, pH7.4

Purify Affinity purification
Dilution IHC 1:500-1:2000

Background

This gene encodes a member of the doublecortin family. The protein encoded by this gene is a cytoplasmic protein and contains two doublecortin domains, which bind microtubules. In the developing cortex, cortical neurons must migrate over long distances to reach the site of their final differentiation. The encoded protein appears to direct neuronal migration by regulating the organization and stability of microtubules. In addition, the encoded protein interacts with LIS1, the regulatory gamma subunit of platelet activating factor acetylhydrolase, and this interaction is important to proper microtubule function in the developing cortex. Mutations in this gene cause abnormal migration of neurons during development and disrupt the layering of the cortex, leading to epilepsy, cognitive disability, subcortical band heterotopia ("double cortex" syndrome) in females and lissencephaly ("smooth brain" syndrome) in males. Multiple transcript variants encoding different isoforms have been found for this gene.
