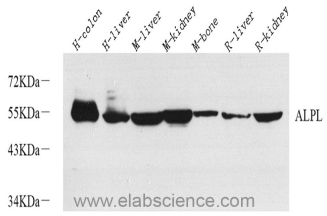
# ALPL Polyclonal Antibody

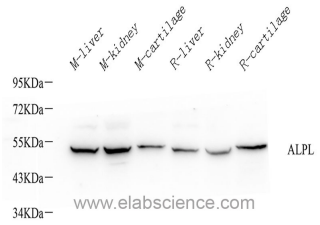
| | | | |
|---|---|---|---|
| **Catalog No.** | E-AB-70384 | **Reactivity** | H,M,R |
| **Storage** | Store at -20℃. Avoid freeze / thaw cycles. | **Host** | Rabbit |
| **Applications** | WB | **Isotype** | IgG |

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## Images



Western Blot analysis of various samples using ALPL Polyclonal Antibody at dilution of 1:1000.



Western Blot analysis of various samples using ALPL Polyclonal Antibody at dilution of 1:1000.

## Immunogen Information

| | |
|---|---|
| **Immunogen** | Recombinant protein corresponding to Mouse Alkaline Phosphatase |
| **Swissprot** | P05186,P09242,P08289 |
| **Synonyms** | ALPL, AP-TNAP, APTNAP, HOPS, TNAP, TNSALP, alkaline phosphatase,liver/bone/kidney, TNALP |

## Product Information

| | |
|---|---|
| **Calculated MW** | 57kDa |
| **Observed MW** | 55kDa |
| **Buffer** | PBS with 0.02% sodium azide, 1% protective protein and 50% glycerol, pH7.4 |
| **Purify** | Affinity purification |
| **Dilution** | WB 1:500-1:2000 |

## Background

There are at least four distinct but related alkaline phosphatases: intestinal, placental, placental-like, and liver/bone/kidney (tissue non-specific). The first three are located together on chromosome 2, while the tissue non-specific form is located on chromosome 1. The product of this gene is a membrane bound glycosylated enzyme that is not expressed in any particular tissue and is, therefore, referred to as the tissue-nonspecific form of the enzyme. The exact physiological function of the alkaline phosphatases is not known. A proposed function of this form of the enzyme is matrix mineralization; however, mice that lack a functional form of this enzyme show normal skeletal development. This enzyme has been linked directly to hypophosphatasia, a disorder that is characterized by hypercalcemia and includes skeletal defects. The character of this disorder can vary, however, depending on the specific mutation since this determines age of onset and severity of symptoms. Alternatively spliced transcript variants have been described.
